

Connecting to the Houston wireless network with your Mac

The following instructions are for setting up Mac OS X to connect to the Houston Wireless Network. These instructions pertain to Mac OS X version **10.4 and later**. If you are using a version of MAC OS X older than version 10.4 contact the staff for assistance.

1. Click on your Airport icon at the top right of the screen. If the Airport is off, go under the Airport menu and select Turn Airport On.
2. From the list of wireless networks select ABFH.
3. In the window that pops up enter the password abftulane and select join.

Alternate Wireless network setup

1. Click on your Airport icon at the top right of the screen. If the Airport is off, go under the Airport menu and select Turn Airport On.
2. In the drop down menu select Join other network.
3. In the Network name type in TulaneH
4. For Security select WEP Password
5. For the password type in tulanehouston
6. Click on Join.
